## **Discover View, NCC Group's new enhanced secure depositing portal**

Every software supplier or software end user that we work with is ultimately protecting its business, enhancing its resilience and ensuring long term availability of software through the regular deposit of the code or materials that are required to access, or rebuild and restore business critical applications.

Along with verification, regular deposits are key to ensuring that our software resilience services deliver maximum value to our customers so we've invested in our new enhanced online deposit management portal, View to

ensure that the entire source code and material deposit management process is as simple, secure and streamlined as possible for our customers.

Features include; automated and scheduled depositing functionality, on-demand access and 24/7 visibility and with 24/7 monitoring by our security operations centre (SOC), customers can experience the highest level of assurance in the security of their deposits.

Simon Fieldhouse, global managing director, Software Resilience at NCC Group comments: “The launch of View is just the beginning of a series of future product releases and service enhancements as we look to help our customers improve resilience as the technology landscape continues to evolve.

We are focused on ensuring that we keep on delivering maximum value to our customers so they can adopt, innovate and manage new and existing technology with confidence.”

Available initially to our UK customers only, View will be rolled out across all regions over the coming months.
